

Leaders in LED Lighting + Integration Services

Hilux

Introducing Hilux, an innovative company with an industry-leading background in LED lighting and LED integration services. As a subsidiary of SoundOff Signal, a leader in transportation LED lighting for more than 10 years, Hilux designs and manufactures the highest quality and most durable LED lighting products.

Making the Switch

Hilux's experienced engineers work with traditional lighting companies to transition their products from existing HID, fluorescent, and incandescent sources to a more energy efficient and sustainable LED solution. Our capabilities also extend to other industries where in-house engineering expertise needs to be augmented from an outside resource.

Additionally, through its xternaLED brand, Hilux serves the medical, office furniture, residential, military and municipal outdoor lighting markets by providing innovative solutions.

Hilux Provides Quality & Innovation

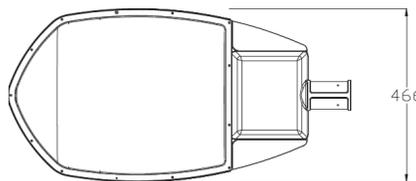

Through our global supply chain, Hilux not only works closely with some of the world's largest suppliers of LEDs, but we also maintain light engine and fixture manufacturing capabilities in both the United States and China. Over the years, we have designed superior products that work in some of the harshest environments on the planet.

Hilux has proven expertise in the technologies that ensure LED lighting success:

- LED light engines – design and manufacture
- Power supplies and drive circuitry – design and manufacture
- Thermal management of LED light fixtures
- Optical design to optimize light intensity and dispersion patterns

Benefits of LED Lighting:

- 40-50% reduction in energy consumption vs. traditional HID lighting technologies
- Long life – 50,000 hours (to 70% output)
- Improved control of light, improved uniformity, and reduction of stray light
- No mercury, lead, gases, or other disposal hazards
- Effective low-temperature performance
